

# HTML Part 4

SJT Codes

# Images

- \* `<img>` tag
- \* Must include *src* and *alt*
- \* Try it by pasting the following code into an existing exercise:

```

```

# Links

- \* `<a>` defines a link.
- \* Word(s) used to link to other pages or documents.
- \* Cursor changes to a hand when hovered over a link.
- \* `href` points to the destination.
- \* Try it yourself:

```
<a href="http://www.mrfiliplic.com">Mr Filiplic's  
Website</a>
```

**WARNING:** due to saving to the server, the above example will result in an error

# Final Project

- \* You are now ready for your [final project](#)
- \* Be sure to incorporate everything you know from tutorials 1, 2, 3, and 4
